1. Onboarding Journey

1.1 Signup & Role Selection

Step	What Happens	Page
Sign up	Email/password registration	/auth/signup
Welcome email	3-step setup guide sent via Resend	Automatic
Onboarding wizard	Profile, How It Works, Role toolkit	/onboarding
Role selection	Photographer, Agent, Broker, PM, Owner	Step 1
Role-specific CTAs	Toolkit overview tailored to role	Step 3

1.2 First-Use Activation (7 Quick Wins)

Feature	What It Does
Hero before/after slider	Homepage draggable demo showing sky replacement
Sample listing CTA	"Try with Sample Photos" for zero-listing users
Celebration modal	Confetti modal when first listing is prepared
Processing toasts	Real-time toast notifications during AI preparation
Role-tailored onboarding	Different toolkit highlights per role

1.3 Academy (31 Guide Pages)

Self-serve knowledge base at [/academy](#):

- Getting Started (4 pages): First listing, studio guide, first enhancement
- Enhancing Photos (8 pages): Each AI tool explained
- Photography Tips (5 pages): Shooting, equipment, composition, lighting
- Delivering to Clients (3 pages): Approvals, sharing galleries
- Plans & Credits (4 pages): Understanding credits, billing FAQ
- Troubleshooting (5 pages): Account, upload, processing, quality issues

2. Photographer Journey

2.1 Setup

Signup → Select "Photographer" → Profile → Packages → Availability

Feature	Description	Location
Profile setup	Name, business, bio, contact	/dashboard/settings
Brand kit	Logo, colors, fonts	/dashboard/brand
Package creation	Service tiers with pricing	/dashboard/photographer/bookings
Availability	Set available days/times	/dashboard/photographer/bookings
Public portfolio	Showcase best work	/dashboard/portfolio
Booking form	Branded page for agents to book	/book/[slug]

2.2 Core Workflow: Booking → Shoot → Deliver

Stage	Pipeline Status	What Happens
Pending	New booking received	Agent fills out form with package, property, date
Confirmed	Photographer accepts	Date confirmed, both parties notified
Shot	Photos captured	Photographer marks as shot after visiting property
Editing	Photos uploaded	Upload → AI Prepare → Enhancement pipeline runs
Delivered	Gallery shared	Client approval link sent, client approves/rejects

2.3 AI Enhancement (15 Tools)

Automatic Mode: Upload photos → Hit "Prepare" → AI classifies each photo → Applies optimal tools.
Typical batch: 30-50 photos in under 60 seconds.

Manual Mode (AI Studio):

Category	Tools	Presets
Exterior	Sky Replacement	Clear Blue, Sunset, Dramatic Clouds, Twilight Sky
	Virtual Twilight	Multiple twilight intensities
	Lawn Repair	Auto-detects and greens lawn areas
	Pool Enhancement	Water clarity and color

Category	Tools	Presets
Interior	Declutter	Removes clutter, personal items
	Virtual Staging	Furnish empty rooms by room type
	Fire in Fireplace	Adds realistic fire glow
	TV Screen Art	Replaces TV screens with artwork
	Lights On	Illuminates dark rooms
	Window Masking	Balances interior/exterior exposure
Enhance	HDR Processing	Multi-exposure look
	Auto Enhance	One-click color/brightness optimization
	Color Balance	White balance and tone correction
	Perspective Correction	Straighten verticals
	Lens Correction	Remove barrel/pincushion distortion

3. Agent Journey

3.1 Setup

Signup → Select "Agent" → Profile → Connect social accounts → Upload first listing

3.2 Core Workflow: List → Enhance → Market → Close

Step 1: Upload Listing

Create listing with property details (address, price, beds, baths, sqft, description). Upload photos up to 50MB each with drag-and-drop.

Step 2: AI Preparation

Hit "Prepare" → AI classifies photos → Applies enhancements → Confidence score calculated. Status: raw → processing → prepared. Celebration modal on completion.

Step 3: Marketing Pipeline (Automatic, 6 Steps)

Step	What	AI Model	Cost
1. Description	MLS-quality property description	GPT-4o	~15c
2. Captions	Platform-specific social captions	GPT-4o-mini	~3c/platform
3. MLS Package	Photo manifest + metadata	None	0c
4. Property Site	Draft property website	None	0c
5. Cinematic Video	Remotion Lambda render	None	Lambda cost
6. Scheduled Posts	Auto-queued with UTM tracking	None	0c

Step 4: Distribution

Cron runs every 15 minutes. Publishes due posts with billing gate check and token refresh.

Platform	Post Types	Video Support
Facebook	Page posts with photos	Video via Graph API
Instagram	Photo + carousel, Reels	Reels via container flow
LinkedIn	Professional posts	Video upload (3-step)
TikTok	Photo carousel	Video via PULL_FROM_URL
Twitter	Text + media	Video upload

Step 5: Measure

Every 6 hours: sync analytics (impressions, likes, comments, shares, reach, engagement rate). ROI tracking, per-listing analytics, content calendar with drag-and-drop rescheduling.

3.3 Lead Management

Pipeline: New → Contacted → Qualified → Touring → Offer → Closed / Lost

Activity	Points
Showing	+20
Form submitted	+15
Phone call	+10
Property site viewed	+8
Email / Text	+5
Drip email sent	+2
Score cap	100

3.4 Open Houses

Create event → Get check-in URL → Display QR at door → Guests check in on phone → Track attendees → Rate interest → Auto-flow to CRM leads

3.5 Video Creation

Template	Use Case
PropertyShowcase	Standard property tour with Ken Burns effect
JustListed	Urgency pacing with listing date badge
OpenHouse	Open house date and event details
PriceDrop	Price reduced badge with comparison
Sold	Celebration styling with social proof

3.6 Additional Agent Features

Feature	Description	Location
CMA	Comparable property analysis	/dashboard/cma
Floor Plans	AI-generated layouts	/dashboard/floor-plans
Virtual Tours	Scene-based tour builder	/dashboard/virtual-tours

Feature	Description	Location
Virtual Staging	Furnish vacant rooms	/dashboard/staging
Renovation	Before/after renovation concepts	/dashboard/renovation
Print Materials	PDF flyers, postcards, brochures	/dashboard/print
MLS Integration	Import from SimplyRETS	/dashboard/mls

4. Broker Journey

4.1 Broker Command Center

Feature	What It Shows
Agent roster	All team members with roles, listing counts, lead counts
Team stats	Aggregate listings, leads, published posts across team
Performance charts	Activity trends over time
Invite agents	Email invitation with role selection

4.2 Team Permissions

Capability	Admin	Editor	Viewer
View team dashboard	Yes	Yes	Yes
Create/edit listings	Yes	Yes	No
Generate marketing	Yes	Yes	No
Publish to social	Yes	Yes	No
Manage leads	Yes	Yes	No
Invite members	Yes	No	No
Manage billing	Yes	No	No
View analytics	Yes	Yes	Yes

4.3 Broker-Specific Features

- Cross-agent analytics: See performance across all agents
- Team content calendar: View all scheduled/published posts across brokerage
- Centralized lead pool: Route leads to specific agents
- White-label (Agency+): Embeddable widgets with brokerage branding
- Custom domains (Enterprise): Map your domain to property sites
- REST API (Enterprise): Integrate with existing brokerage CRM/MLS

5. Enterprise Features

Available on Enterprise tier (\$299/mo or \$249/mo annual, 14-day free trial)

5.1 REST API v1

- Auth: Bearer token with sk_live_ prefix, SHA-256 hash stored
- 10 endpoint groups: listings, photos, leads, video, webhooks, status
- Rate limit: Configurable per key (default 60 req/min)
- OpenAPI 3.0 spec: /api/v1/openapi.json (1037 lines)
- Interactive docs: /developers/api-reference

5.2 Custom Domains

- Map your domain to property sites or portfolios
- DNS TXT verification: _snapr-verify.{domain}
- Verified every 6 hours by cron

5.3 Embeddable Widgets

- Types: Before/after slider, photo gallery, property card
- iframe-based with auto-resize via postMessage
- Available on Agency+ tier

5.4 Outgoing Webhooks

- HMAC-SHA256 signed payloads
- Events: listing.created/updated/prepared, lead.created/updated, post.published/scheduled, photo.enhanced
- Delivery log with response tracking, 10s timeout

6. Billing Tiers

Feature	Free	Gold	Platinum	Enterprise
Listings/month	3	5-300	5-300	Unlimited
Photos/listing	30	50	75	Unlimited
AI tools	All 15	All 15	All 15	All 15
HD exports	No	Yes	Yes	Yes
Content Studio	No	Yes (150+)	Yes	Yes
Social publishing	No	Yes	Yes	Yes
Video creator	No	Yes	Yes	Yes
Email marketing	No	Yes	Yes	Yes
Team management	No	No	Yes	Yes
White-label embed	No	No	Yes	Yes
REST API	No	No	No	Yes
Custom domains	No	No	No	Yes

Pricing:

- Gold PAYG: \$28/listing | Monthly: \$20 (5-50), \$16 (75+) | Annual: \$16 (5-50), \$11 (75+)
- Platinum PAYG: \$30/listing | Monthly: \$22 (5-50), \$18 (75+) | Annual: \$18 (5-50), \$12 (75+)
- Enterprise: \$299/mo or \$249/mo annual

7. Notification System

17 notification types with email + WhatsApp (Twilio) delivery:

Category	Notifications
Transactional	listing_prepared, listing_failed, human_edit_complete, export_ready, tour_published
Client engagement	client_viewed, client_approved, client_rejected, client_downloaded, client_commented
Social	post_published, post_failed
Alerts	credits_low, credits_depleted, social_disconnected, subscription_expiring
Digests	daily_summary, weekly_report

8. Monitoring & Reliability

System	What It Does
10 Vercel crons	Publish posts, sync analytics, refresh tokens, digest, drip, usage, health, MLS, domains, cleanup
Sentry	Error tracking (server + edge + client), Session Replay, cron monitoring
Cron heartbeats	Each cron records success/failure, health-check detects staleness
Slack alerts	Critical alerts via webhook (throttled, 15-min dedup)
Env validation	Fast-fail on missing critical vars at startup
Rate limiting	Per-route limits (3-100 req/min)

9. Technical Architecture

Layer	Technology
Frontend	Next.js 14 (App Router) + React 18 + TypeScript + Tailwind + shadcn/ui
Backend	Supabase (PostgreSQL + Auth + RLS + Realtime + Storage)
Workers	Cloudflare Workers (photo enhancement + marketing pipeline)
Storage	Supabase Storage (raw) → Cloudflare R2 (processed) → Cloudinary (CDN)
AI	OpenAI GPT-4o/4o-mini + Replicate + Runware + AutoEnhance
Video	Remotion 4.0 + AWS Lambda + ElevenLabs/OpenAI TTS
Social	Facebook + Instagram + LinkedIn + TikTok + Twitter APIs
Payments	Stripe (subscriptions + checkout)
Email	Resend (transactional) + Twilio (SMS/WhatsApp)
Monitor	Sentry + OpenTelemetry + custom cron heartbeats + Slack alerts
